Featured Website

Mini-Tech Conference is back... sort of.

My workshop on **Using Social Media for Business** was fun. We had 18 people come and many have connected to me via Facebook, LinkedIn or Twitter. I am really happy that I was able to show people the importance of self-promotion in business.

I am looking for a room in East Peoria to put this workshop on myself. Of course, you will all be invited!

Dear Tammy,

Do you find these email newsletters helpful? So will **your** customers! Web Tech Services, Inc provides an email newsletter service for up to 500 email accounts. We will write the material, send out the news once a month (after your approval) and give you monthly reports. We will also supply a sign up form on your website so your customers can easily receive your news. If you are interested in Web Tech Services creating and maintaining your newsletter, let us help! We can also tie this service into your social media maintenance package for **great website traffic!** Contact us for a quote.

Happy Holidays to you all!

Thank you again for your support and encouragement - TF

Make your Website Visible

Web Tech Services incorporates usability features for website visitors when building websites. Think of search engines as visitors to your site also, but with special needs. They need relevant content that they can read.

Without a thorough understanding of how search engines work, all too often your target audience will never get to see your wonderful site. For example, Macromedia Flash is a great tool for creating visually stunning websites, but did you know that search engines cannot "read" flash files and they "see" a site built entirely in flash as having no content?

To capture the attention of your visitors you must first be **found** among the billions of websites on the internet. Web Tech can help your site be seen. Our SEO (Search Engine Optimization) packages are ongoing and we guarantee more visitors to your website! Contact us for more information.

Computer Scam Tips

Have you seen email from Facebook with the subject "New Login System"? Don't open it. It's junk mail from companies trying to get you to purchase some needless items or send you a virus. We have

had many calls regarding this email. Some people get email that look as if they are sent from their banks, PayPal, or credit card companies. These "companies" want you to login and change your password. Many times, these are not from the bank or PayPal and it's a way of stealing your password to PayPal or online banking account. As always, if you are not sure of an email, it's best to ignore it.

Email isn't the only way these companies try to steal your products. Liberty Domains sends out millions of invoices for your domain name. When you sign up with them, you are forced to pay outrageous renewal fees. If Web Tech Services takes care of your hosting and domain name, ignore these. We automatically renew your domain name so there are no worries for you.

We are here to help you. If you are not sure of something, call or email us.

Cool Tool

Picasa 3 is a FREE photo editing software tool from Google. It arranges your pictures and can even create albums based on face recognition. Searching is easy and organizing is a breeze. Share your albums online with friends.

If you are looking for a way to get a grip on all your pictures, this is it. Best of all, it's free!

Download it at

New Billing Process

We will be emailing our bills starting the end of November 2009 using our new billing system, Freshbooks. You will be able to pay for your website or computer repair online and will also receive a reminder. We hope that this new system will be better for both our clients and Web Tech Services!

Please call Tammy or Ashley with any questions 309-699-9327. Please pay promptly to avoid a negative impact on your website and email.
