Featured Website

Spring is coming and Arborists, Karrie and Michael Cady at Alive Tree Care are ready to help your trees.

There is a lot more than you know about trees and helping their environment. Visit their website at

www.alivetreecare.com

Dear Tammy,

I recently gave a presentation at SCORE, Counselors to American's Small Business, regarding social networking, particularly LinkedIn. I was surprised at the types of questions that were asked. Some had never been on LinkedIn and were not sure where to start. I know how it is, people are reluctant to start an account and then try to keep up with it.

Social networking sites such as LinkedIn and Facebook are great to keep in contact with not only your business partners but clients as well. The sites are easy to navigate and sign up is a breeze. Like any other networking opportunity, what you get is what you put in it.

Using your email to get updates can help keep you up to date on what your friends are doing. Maybe they need your services. - TF

Really Make \$\$ with Your Website

I was speaking to a colleague in AZ who was telling me her client makes \$70K a year with affiliate links. I did not believe it. Of course he runs high traffic gaming websites and has sponsors, now I believe it. On our partner page, Web Tech Services provides links to software and computer links. Each time someone purchases from these links, WTS will get a percentage. What I get from these links is far from \$70K, but we do get a little something, and every little bit helps. Here are a few ways to actually make money with your website:

PPC - Pay Per Click. Google has a great program called AdSense, which displays ads on your website of relevant information. Beware as sometimes your competitors will be displayed. So be creative when choosing your keywords. AdSense for Search is another great way to have your own search engine on your website, but get paid when someone uses the relevant search. See <https://www.google.com/adsense> for more info on PPC.

Affiliate Marketing is how a customer receives a commission per sale through their website. Example: Web Tech Partner Page. Join www.cj.com or www.linkshare.com to get more information.

Most of these types of services require a membership but it doesn't hurt to look and see if it will work for your website. I do not recommend using a lot of these on your main page as they tend to be annoying for visitors. As a reminder, **minor** updates are included with your hosting, but these types of updates are not considered minor. However, it may be well worth the effort and small one-time expense.

More Computer Tips

Sometimes System Restore is your only option on "fixing" your computer.

Make Sure System Restore is On

System restore allows you to "go back in time" to recover from a change that damages your Windows system. It takes "snapshots" of the Windows system at various time points, and holds them. You can basically "roll Windows back" to a previous time to get rid of any change that caused the problem. Here is how:

From the Windows desktop, hold down the Windows key and press the Pause/Break key. This will open Windows System Properties. Click the System Restore tab. Uncheck the Disable System Restore box if it is checked.

Note: If you are using Windows Vista, System Restore is turned on by default.

Turn off the Windows XP Desktop Icon Cleanup message

Right click on your Windows desktop, and left click on Properties.

Go to the Desktop tab.

Click the Customize Desktop button.

Uncheck the box that says Run Desktop Cleanup Wizard every 60 days.

Note: This feature was removed in Vista.

Edit the Start Menu Display

Right-click the Start button, then click Properties. You'll see a Start menu tab.

Click on the Start menu tab, then click on the Customize button. On the Advanced tab, make the modifications you want. When you are done, click OK, then Apply, then OK.

Get Inspired!

Sometimes it's tough to find a new domain name. [Domain Pigeon](#) lists available names, sorted either by date added, alphabetically or by most popular.

You might not find the name you want, but it's a nice way to see what others consider a good name and, if nothing else, a way to get inspired to find a new domain name or a new website!

Cool Tool

A new site launched this month is www.monthlylink.com

This website is loaded with links to vendors who want to offer deals to visitors.

Check under Accessories for \$6 shirts. It's true. This site is loaded with t-shirts for \$6! Try it.

Check back often as this site is always changing. And yes, these are all Affiliate links.
